# About Us

Dairy360 ERP is a comprehensive dairy management system developed by Nexellent Technologies to automate and streamline dairy operations. The system integrates milk collection, farmer management, inventory tracking, billing, and financial processes into a single platform.

By digitizing critical dairy workflows, Dairy360 ERP helps organizations improve operational transparency, reduce manual errors, and gain real-time insights into business performance.

The solution enables dairy businesses to manage farmer relationships efficiently, monitor milk procurement, control production processes, and ensure accurate financial reporting.

With its scalable architecture and intuitive interface, Dairy360 ERP empowers dairy enterprises to enhance productivity, optimize resource utilization, and achieve sustainable business growth.

# About Nexellentec

Nexellentec helps manufacturing companies automate operations using customised ERP solutions.

## We focus on:

Operational control

Transparency

Profit improvement

Scalable systems for growth

**We build structured business systems – not just software.**

# Challenges We Face Today

## Manual Data Entry

Staff spending hours typing same information into multiple systems

## Stock Confusion

Not knowing what's in stock causing delays and missed sales

## Disconnected Systems

Sales, production, and finance using different tools

## Limited Visibility

Management can't see real-time business performance

## Manual Order Processing

Orders taken manually, no auto stock check

## Payment Delays

Customer payments not followed up systematically

# Challenges We Face Today

## No Proper Traceability

Purchase Order, Sale Order,  
Production not connected

## Supplier Rate Disputes

Quality-based pricing not clearly  
calculated

## Expiry & Slow Moving Stock

Products expire in warehouse, no  
reminders

## Work Responsibility Not Clear

Tasks assigned verbally, no  
tracking

# Solution: Customer Portal with Auto Stock Check

## How it works:

- Checks stock availability
- If available → Sends confirmation email
- If not → Checks raw material
- If raw material available → Confirms order
- If not possible → Reschedules order

## Benefits:

- ✓ Instant order confirmation
- ✓ No manual stock checking
- ✓ Better customer experience

# Solution: Automatic Customer Payment Reminders

## How it works:

System sends automatic reminder emails for due payments.

- Pending customer payments
- Total Pending
- Payment pending days

## Benefits:

✓ Improved cash flow

✓ Reduced manual follow-up

✓ Better payment collection

# Solution: Task Assignment & Work Monitoring

## How it works:

- Work assigned inside system.
- Each user can update status.
- Management can track progress of any project or sale order.

## Benefits:

✓ Clear accountability

✓ On-time completion

✓ No blame shifting

# Solution: Farmer / Supplier Integration

## How it works:

- Quality check linked with rate calculation.
- Automatic payable calculation based on quality.
- PO email sent automatically.

## Benefits:

- ✓ Transparent pricing
- ✓ Stronger supplier relationship
- ✓ Zero disputes

# Solution: Quality-Based Rate Calculation

## How it works:

- QC results directly impact rate.
- System calculates final payable amount automatically.
- No manual formula dependency.

## Benefits:

✓ 100% accuracy

✓ Zero payment disputes

✓ Trust with suppliers

# Solution: Document Linking & Traceability

## How it works:

- All documents connected:
- Purchase Order → Goods Receipt → Quality Check → Production  
→ Sale Order → Delivery Note → Invoice
- Full history available anytime.

## Benefits:

✓ Easy audit

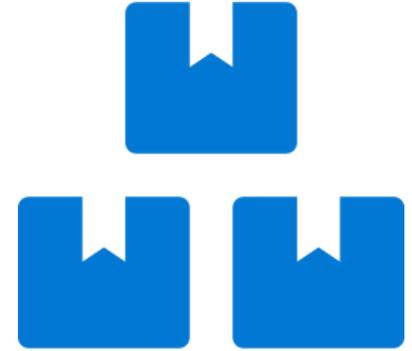

✓ Instant traceability

✓ Complete transparency

# Solution: Expiry Alerts & Smart Offers

## How it works:

- System gives expiry date reminders.
- Alerts for slow-moving stock.
- Helps management plan discount offers.

## Benefits:

✓ Reduced expiry loss

✓ Better stock rotation

✓ Improved working capital

# Solution: Management Dashboard

## How it works:

Complete business visibility on one screen

- Production status
- Order status
- Pending tasks
- Pending payments
- Old stock report
- Profit per item

## Benefits:

✓ Real-time insights

✓ Data-driven decisions

✓ Complete business control

# Why Nexellentec?

- ✓ We understand manufacturing challenges.
- ✓ We customise ERP as per your business flow.
- ✓ We focus on automation, control and profitability.

## Suitable for:

**Dairy**

**Food Processing**

**Daily Use Products**

**Manufacturing**

*Let's transform your business with smart automation*

# With Nexellentec ERP, you get:

Automated Operations

Real-Time Visibility

Controlled Cash Flow

Improved Profitability

*Let's build a smarter and more profitable business together.*
